About VBL Therapeutics

Vascular Biogenics Ltd., operating as VBL Therapeutics (VBL), is a late-clinical stage biopharmaceutical company focused on the discovery, development, and commercialization of first-in-class treatments for difficult-to-treat malignant solid tumors and immune or inflammatory indications. VBL's novel VTS™ gene-based platform and antibody-based monocyte targeting technology enable the creation of a pipeline of programs that are designed to harness the body's innate biological processes to provide unique solutions for significant unmet medical needs. VBL's lead oncology product candidate, ofra-vec (ofranergene obadenovec; `VB-111`), is an investigational targeted anti-cancer gene-based agent in development to treat a wide range of solid tumors. Ofra-vec is currently being studied in a Phase 3 registration-enabling clinical trial (NCT03398655) for platinum-resistant ovarian cancer. To learn more about VBL, please visit vblrx.com or follow VBL on LinkedIn, Twitter, YouTube or Facebook.
